To the hiring committee

Subject: Recommendation for Mr. Shyam Bhetuwal

Dear Members of the hiring committee, I am providing a recommendation for Mr. Shyam Bhetuwal in support of his application for the mentioned position.

I have observed him working in the Flavoria Flex project in a role where he had to apply pattern recognition (PR) and machine learning skills in a complex and creative way to estimate the calorie content of food dish from a image in our university's lab. Persons who can plan, implement and verify such a difficult PR problems and integrate them to a real-time process, truly qualify as future researchers. He has integrated hardware, software with AI/Machine Learning models, used multimodal approaches and transfer learning concepts to collect the data and analyze the data in his project.

He has mapped the multi dished food names from versatile language to Finnish names and the whole process of name mapping and nutritional information re-correction is automated. He has automated the data collection process as well and has also analyzed the data himself. His paper as the first author from the same project has been accepted as the First author in the "IEEE Global Conference on Artificial Intelligence & Internet of Things (IEEE GCAIoT)" 2025.

I am his professor of Machine Learning and Pattern Recognition, working in the same department of computing (Data Science Group), He got 5 in my subject.

He has strong technical skills in Advanced Software Engineering, Data Analytics, ML, AI algorithms and concrete research experience. I have no doubt that Mr.Bhetuwal will thrive in any research platform. I highly recommend him for the researcher/PhD position.

Mr Bhetuwal has been living in Finland for about 8 years. He has very positive attitude, honest personality and down to earth person I have ever seen. Mr Bhetuwal is one of the most talented and energetic research-oriented students I have met. Please feel free to contact me if you need any further information.

Sincerely, Paavo Nevalainen,

senior Researcher Algorithmics and Computational Intelligence University of Turku
